Medistri's Manufacturing Services - Medistri

Medistri's Manufacturing Services

Created for start-up companies and early-stage products, Medistri's manufacturing team can offer primary, secondary, and tertiary packaging solutions that fit your strategic & regulatory requirements.

Outsourcing the manufacture of single-use surgical kits frees up your internal resources, reduces costs, speeds up time to market and provides your end users with better product functionality.

The advantages of Medistri's fully integrated in-house infrastructure for Switzerland's university hospitals include:

- Faster time to market.
- Lower costs.
- Reduced complexity in your supply chain.
- So you can focus on what you know best.
- Simplify the logistics process.
- Easily implement changes required by your customer.

Whatever your needs, Medistri's manufacturing team works with our quality team to ensure that our customers' customised single-use surgical kits are brought to market.

Within the development of your product, Medistri will provide a custom solution according to your specificity:

- Product Assembly
- Integration
- Cleaning
- Packaging/ Secondary Packaging
- Labeling
- EO Sterilisation (or Steam Sterilisation)
- Quality Control
- Distribution & Logistics
- CE Marking

Medistri is certified by Swissmedic for the management and sales of pharmaceutical components. You can now supply your own core-product and Medistri will add the desired pharmaceutical elements to your final packaging.

From manufacturing to product assembly and certification, leverage our team's expertise to find the custom solutions that fits your timeline requirements.
