

Providing Sterilization & Laboratory Services
for the world's most innovative healthcare
companies.

Announcement

Visit Medistri at Pharmapack 2026

January 19th 2026

As the pharmaceutical industry gathers in Paris for Pharmapack 2026, Medistri joins the event with a clear purpose: connecting innovation, speed, and quality across every stage of healthcare manufacturing.

Medistri will be present at Booth 4C47, welcoming partners and industry professionals to explore how our integrated sterilization, laboratory, packaging validation, and logistics services can support and strengthen their development, industrialization, and supply strategies.

By combining advanced infrastructure with strong regulatory expertise, Medistri enables manufacturers to accelerate time-to-market while maintaining uncompromising quality, traceability, and compliance.

Throughout the exhibition, Shoko Nilforoushan, Sean Nilforoushan, Mélanie Bangerter, Gabriel Vachey, and Ana Burlet will be available to discuss your upcoming objectives and collaboration opportunities for 2026 and beyond.

Medistri will be exhibiting at Booth 4C47 at Paris Expo Porte de Versailles, from 21 to 22 January 2026.

To get in touch or to schedule a discussion, send us an email at development@medistri.com or contact us [here](#).
