

Providing Sterilization & Laboratory Services
for the world's most innovative healthcare
companies.

Customer Announcement - August 10th 2026

Medistri HU Operates Under ISO 14001

Dear Business Partners,

We are pleased to highlight that Medistri's facility in Székesfehérvár, Hungary operates under an ISO 14001-certified Environmental Management System, reinforcing our commitment to responsible and sustainable operations across our infrastructure.

ISO 14001 provides an internationally recognized framework for identifying and managing environmental impacts, establishing environmental objectives, addressing regulatory requirements, and continuously improving environmental performance.

Strengthening Our Environmental Commitment

The certification of our Hungarian facility supports a structured approach to environmental management, including the identification of environmental aspects related to our activities, pollution reduction, regulatory compliance, and continuous improvement.

As part of this approach, Medistri monitors the carbon footprint associated with its sterilization activities, including CO₂ emissions per pallet. Customers can also receive a dedicated certificate providing visibility into the CO₂ emissions associated with their sterilization activities, supporting their own sustainability reporting and environmental objectives.

Together with our ISO 14001-certified operations in Switzerland, this supports a consistent approach to environmental responsibility across Medistri's sterilization infrastructure.

This commitment reflects our continued efforts to support our customers with reliable services while contributing to more sustainable healthcare supply chains.

As always, our dedicated team is available to assist with any inquiries or upcoming projects. Please feel free to reach out to us at contact@medistri.com or by phone at +41 026 676 90 80.

We thank you for your continued partnership and support.

Sincerely,

Your Medistri Team

FAQ – ISO 14001 at Medistri HU

1. What does ISO 14001 certification mean for Medistri's Hungarian facility?

ISO 14001 confirms that Medistri's facility in Székesfehérvár operates under a certified Environmental Management System designed to identify and manage environmental impacts, address regulatory requirements, establish environmental objectives, and support continuous improvement.

2. What environmental aspects are addressed through Medistri's Environmental Management System?

The system provides a structured framework for managing environmental aspects associated with our activities,
