

Providing Sterilization & Laboratory Services
for the world's most innovative healthcare
companies.

Announcement

Medistri At CPHI Milan 2026

August 10th 2026

Medistri will be exhibiting at CPHI Europe 2026, taking place from October 6 to 8 in Milan, Italy.

As one of the leading international events for the pharmaceutical industry, CPHI Europe brings together organizations and professionals from across the pharmaceutical supply chain to exchange expertise, explore new technologies, and discuss developments shaping drug development and manufacturing.

Medistri will be present at booth 11D33, located in the Packaging & Drug Delivery area.

Supporting Healthcare Projects Across the Product Lifecycle

Throughout the event, our team will be available to discuss how Medistri supports healthcare companies across different stages of product development and industrialization. Our integrated infrastructure combines:

- Sterilization Services
- Laboratory Services
- Validation Services
- Manufacturing Services

Through our facilities in Switzerland and Hungary, these capabilities allow projects to transition between development, validation, and routine operations while maintaining continuity and centralized coordination.

Discuss Your Upcoming Projects

CPHI Europe provides an opportunity to discuss current challenges, upcoming developments, and future requirements directly with our specialists. Whether you are preparing a new product for development, approaching validation, scaling toward routine production, or looking to strengthen your existing supply chain, our team will be available to discuss how Medistri can support your requirements.

Medistri will be featuring its commitment to innovative speed, uncompromising quality, and tailored sustainable solutions. We are very happy to come and visit our customers to discuss their 2026 and onward objectives!

To get in touch or to schedule a discussion, send us an email at development@medistri.com or contact us [here](#).
