

Providing Sterilization & Laboratory Services
for the world's most innovative healthcare
companies.

FOR IMMEDIATE RELEASE - August 10th 2026

Medistri HU Strengthens Environmental Commitment with ISO 14001

EN - Medistri, a leading provider of contract sterilization & laboratory services for healthcare companies, operates its facility in Székesfehérvár, Hungary under an ISO 14001-certified Environmental Management System, reinforcing the company's commitment to responsible environmental management across its infrastructure.

ISO 14001 provides a structured framework for identifying environmental impacts, establishing environmental objectives, addressing applicable regulatory requirements, reducing pollution, and continuously improving environmental performance.

As part of this approach, Medistri monitors the carbon footprint of its sterilization activities, including CO₂ emissions per pallet. Customers can also receive a dedicated certificate providing visibility into the CO₂ emissions associated with their sterilization activities at Medistri, supporting their own environmental monitoring, sustainability reporting, and supply chain objectives.

Founded in 2006, Medistri has been focused on building infrastructure for the healthcare industry. Companies of every size, from startups & university projects to Fortune 500 companies, use our services to save time, scale, and focus on what they do best.

Medistri is committed to continuously improving its environmental performance while working closely with clients and partners to support more responsible and sustainable healthcare supply chains.

– The Medistri Team

"Integrating environmental responsibility into our operations is an important part of how we continue developing Medistri. Having our Hungarian facility operating under ISO 14001 allows us to maintain the same environmental ambitions as we continue expanding our infrastructure," said Jonathan Chion, Head of Sustainability.
